

[Document name] Abstract

The present invention relates to a novel piperidine compound represented by the formula [I]:

5

wherein Ring A represents an optionally substituted benzene ring, Ring B represents an optionally substituted benzene ring, R¹ represents an optionally substituted hydroxyl group, a substituted thiol group, a substituted sulfonyl group, etc., or a group represented by the formula:

10

15

R¹¹ represents a substituted carbonyl group or a substituted sulfonyl group, R¹² represents hydrogen atom or an optionally substituted alkyl group, R² represents hydrogen atom, etc., Z represents oxygen atom or a group represented by -N(R³)-, R³ represents an optionally substituted alkyl group, etc., R^{4a} represents an optionally substituted alkyl group, R^{4b} represents an optionally substituted alkyl group, or a pharmaceutically acceptable salt thereof, having an excellent tachykinin receptor antagonistic action.
